**Abstract:** In 2020, on the basis of Article 24 of the Federal Law of 24.04.1995 No. 52-FZ "On the animal world", by order of the Ministry of Natural Resources and Ecology of the Russian Federation dated 24.03.2020 No. 162, the List of objects of the animal world included in the Red Book was approved. At present, the printed edition of the Red Book of the Russian Federation has been prepared for publication. It includes 9 species of amphibians and 41 species of reptiles (50 species in total). Compared to the previous edition, which included 8 species of amphibians and 21 species of reptiles (29 species in total), the number of species included in the list has increased significantly. In the new edition of the Red Book, for each species, Latin and Russian common names are indicated, as well as distribution in Russia and in the world, category and status of rarity according to the approved List of objects of the animal; category and status in the Red Book 2001,

category of threat of extinction according to the approved List; the priority of environmental protection measures and the reasons for its assignment. In the species chapters, the existing information about habitats and features of the ecology, abundance, and limiting factors is collected. The security measures taken are reviewed and the additional security measures required are recommended. A list of information sources, images of animals, and maps of the area are provided.
